## Preliminary February 2022 and Winter 2021-22 Climate Summary

This winter the ENSO (El Niño Southern Oscillation) has been in a La Niña phase which usually means that we'll see overall temperatures near to slightly above normal for the season while rainfall will be below normal. This overall pattern has been pretty close for most of West Central and Southwest Florida, but it didn't look this way a few weeks back. We started the season above normal for December, then during January, we saw a wide range in temperatures, but for the month ended up slightly below to slightly above normal. For February we had some cooler days in the first half of the month and then several warm days in the second half with temperatures running near to a couple of degrees above normal so far.

Below are graphics that depict the monthly/season average and departure from normal (average) temperature (based on the 1991-2020 Normals) across the area.

Temperature (F)  
12/1/2021 - 12/31/2021

Departure from Normal Temperature (F)  
12/1/2021 - 12/31/2021

December 2021

Temperature (F)  
1/1/2022 - 1/31/2022

Departure from Normal Temperature (F)  
1/1/2022 - 1/31/2022

**January 2022**

Temperature (F)  
2/1/2022 - 2/25/2022

Departure from Normal Temperature (F)  
2/1/2022 - 2/25/2022

**February 1-25, 2022**

Graphics Source: NOAA Regional Climate Centers

As for rainfall it has been a rather dry February with well below normal amounts across the entire region, and for the Winter 2021-2022 so far most locations are also well below normal and in the Top Ten Driest. On the following pages are graphics that depict the monthly/season total and departure from normal (average) rainfall (based on the 1991-2020 Normals) across the area.

Rainfall December 2021

Percent of Normal
